

Multi-Agent Orchestration Build Day

May 31, 2026 · The Engine, 750 Main St, Cambridge, MA

Hosted by AGI House × W&B × TNT × SundAI Club × E14 · Venue Partner: The Engine

Quick Info

- 🏠 **Address:** 750 Main St, Cambridge, MA 02139
 - 🕒 **Doors open at 9:30am.** Speaker session kicks off at 10am.
 - 📋 **Check-in:** Head to the front desk when you arrive — you'll check in and sign a liability waiver before heading in. Make sure you have your confirmation handy!
 - 🍽️ **Food:** Breakfast, lunch, snacks, and dinner provided throughout the day.
 - 👤 **Teams:** Solo hackers welcome, or team up with up to 4 others. We'll have a team formation session after the kickoff — you can also find teammates in the team formation channel on the AGI House platform.
 - 📄 **Draft submissions due at 7pm. Final submissions due at 8pm.**
 - **SIGN UP HERE TO CONFIRM YOUR REGISTRATION & SUBMIT PROJECTS:**
app.agihouse.org/events/multi-agent-orchestration-build-day
-

Schedule

Sunday, May 31

- **9:30am** — Doors open, coffee + networking
 - **10:00am** — Keynote, panel, & AI News
 - **11:00am** — Idea pitching & team formation
 - **11:30am** — Building starts
 - **1:00pm** — Lunch & demos
 - **2:00pm** — Workshop
 - **4:30pm** — Project check-ins
 - **6:00pm** — Dinner
 - **7:00pm** — Draft submissions due on AGI House platform
 - **8:00pm** — Final submissions due & judging begins
 - **9:30pm** — Awards ceremony & close
-

Getting There

Public Transit

The closest station is Central on the Red Line — about an 8-minute walk to 750 Main St. We recommend transit or rideshare when possible.

Parking

There is a parking garage behind the building at 99 State St. Daily parkers can scan the QR code in the garage to create a Metropolis account — one-time setup requiring your phone number, email, license plate, and payment method.

- 0–1 hr: \$18
- 1–1.5 hrs: \$26
- 1.5–2 hrs: \$36
- 2+ hrs: \$45 daily max
- Note: a \$2.25 service fee applies for visiting parkers

Credits & Tools

API Request form: <https://forms.gle/rj1tGOK6cBeYmvq38>

Get started with W&B

SIGN UP — FREE

Create a W&B account

Tracing, evals, and monitoring for your agents in minutes.

wandb.ai/site

HACKATHON PERK

W&B Inference credits

Request free Inference API credits for your build.

Inference credit request form

Here's how to start using W&B:

1. Create a W&B account - <https://wandb.ai/site>
2. Setup tracing of your agent with W&B Weave - <https://docs.wandb.ai/weave/quickstart>, <https://docs.wandb.ai/weave/reference/service-api#service-api-overview>
3. Setup W&B MCP (and Skills) to use coding agents to help you instrument, evaluate and optimize your agents (very helpful!) - <https://docs.wandb.ai/platform/mcp-server#use-the-w&b-mcp-server>
4. Intermediate: setup evaluations on Weave which GREATLY helps to optimize your multi-agent system and have coding agents hill-climb specific metrics for you automatically (using the MCP) - https://docs.wandb.ai/weave/guides/evaluation/evaluation_logger#log-evaluation-data-from-your-code, or create ONLINE evals with <https://docs.wandb.ai/weave/guides/evaluation/monitors#set-up-monitors> (easier for multi-turn evaluation potentially)
5. Intermediate: next to 100 USD of W&B Inference credits there are 500 USD of W&B Training credits everyone gets in case you are considering SFT or GRPO)

These are the two blogs that we shared from Anthropic on multi-agent systems

(<https://www.anthropic.com/engineering/multi-agent-research-system>) and the new dynamic workflows (<https://code.claude.com/docs/en/workflows>), which I would recommend using through the Claude agent SDK (<https://code.claude.com/docs/en/agent-sdk/overview>), with which Weave has an integration (https://docs.wandb.ai/weave/guides/integrations/claude_agent).

Reach out to Uma and Nico if you have any questions!

Let the W&B team know if you have any questions!

Prizes

	Most Sophisticated Harness — 1st Place	Unitree G2 Pro Robot Dog + \$2,000 cash
	Most Sophisticated Harness — Runner-Up	\$2,000 cash + Hugging Face Reachy Mini (per team member)
	Most Sophisticated Harness — 3rd Place	\$1,000 cash + TRMNL e-ink frame
	Best Use of Weave	\$1,000 cash

Eligibility Requirements

These apply to prize eligibility — anyone is welcome to demo regardless.

- Code must be in a public GitHub repository (your code and rights remain yours)
 - Project must be built entirely at the event — no extending prior work
 - Work must be primarily your own
 - Must be present in-person and demo on the day
 - Cannot work for a sponsor organization
 - AI coding tools are fully encouraged — go wild
-

Submissions

All submissions go through the AGI House platform:

→ app.agihouse.org/events/multi-agent-orchestration-build-day

Every submission should include:

- A unique team name
 - Names of all team members (include emails and socials)
 - A short screen recording demo of what you built (under 2 mins)
 - Your X and/or LinkedIn handles for social tagging
 - A thorough project description including:
 - 2–3 sentence summary of what you built
 - What it does and what problem it solves
 - How it's built — which orchestration protocols (A2A, MCP, etc.), agent frameworks, and tools you used
 - A list of every sponsor tool used and how you used it
-

Judging Criteria

Judging happens in two rounds. First, all teams present in front of a judge panel — 3 minutes per team with an optional 2-minute Q&A. Finalists then present in front of the full room.

- **Agent Orchestration** — Does the project meaningfully show multiple agents working together?
 - **Utility** — Does it solve a real problem?
 - **Technical Execution** — Does it work? Are the architecture decisions sound?
 - **Creativity** — Is the approach or problem novel?
 - **Sponsor Usage** — Did they meaningfully use one or more sponsor tools?
-

On-Site Support

Partners & organizers will be walking around throughout the day and are happy to help you build with their tools. Don't hesitate to flag them down — that's what they're here for. If you're not sure who to find,

any member of the AGI House or W&B team can point you in the right direction, and feel free to use the event channels to ask questions on the AGI House event page!

Still Need Help?

Find any member of the org team on-site — we're happy to help with anything from logistics to debugging.
